## SUMMARY

Innovative Software Developer with a passion for creating reliable applications. Possesses excellent problem-solving skills. Dedicated Software Developer with a background in developing custom applications. Skilled in application performance optimization, and database development.

---

## EXPERIENCE

### Software Developer

Aponiar Solution

July 2022 - Present, Kolkata, India

- Developed multiple web applications using React, Node, and MongoDB, enabling the applications to acquire critical information and key metrics of clients.

---

## PROJECTS

### Frontrol Workbench

Aponiar Solutions • <https://webapp-frontend-aecom-p1w2.azurewebsites.net/> • January 2023 - Present

- The project transformed Frontrol Workbench into a more dynamic and user-friendly tool, resulting in a 50% increase in user count and a 30% rise in user satisfaction. This was achieved by improving the user interface, streamlining project creation, and leveraging advanced technologies for a better client experience. Ongoing collaboration will lead to further project milestones.

### Traning Module

Aponiar solution • October 2022 - December 2022

- Developed a custom web development training module that increased retention rates by 20%. This transformed the learning experience for junior team members, creating an engaging and well-structured environment using modern web development tools. The training application was completed in three months, providing a strong foundation in web development. It reflects our commitment to talent development and readiness for web development challenges. The module reduced training time by 40% and utilized HTML, Bootstrap, React.js, CSS, and JavaScript.

### Birthday Alert

Aponiar Solution • August 2022 - November 2022

- The Birthday Alerts project started as a home assignment to solve the issue of missing colleagues' birthdays within the company. The goal was to create an app that sends birthday alerts via email and Slack. In just four months, the project successfully automated birthday notifications, strengthening team bonds. It reflects our commitment to a positive workplace culture. We used MongoDB, HTML5, Express.js, React.js, CSS, and JavaScript for its development.
